

Yealink T22P

The Yealink SIP-T22P features an intuitive user-interface and enhanced functionality to make user interaction and operation very easy and efficient. The TI TITAN chipset and TI leading VoIP voice engine provide enhanced high-definition audio, outsourced management options, flexible installation and the addition of third-party communications applications. As a cost-effective IP solution, the T22P helps users to streamline their business systems and delivers a powerful, secure and consistent communication experience for both small and large office environments.
